Job Responsibilities

We have many cloud servers and services to cater to multiple applications and environments. To meet the growing needs, we are in the process of expanding our existing DevOps team to achieve shorter development cycles, and to enhance processes to address deployment failures, rollbacks and time to recover. Apart from continuous monitoring, the DevOps team is also responsible for maintaining code repositories, running security scans to keep the systems up and running.

Requirements & Qualifications:

- Implement and manage continuous delivery systems and methodologies on Azure, AWS Cloud Platform.
- Design and maintain automated deployment systems.
- Recommend process improvements to ensure system scalability and reliability.
- Support development and maintenance of CI/CD processes for application deployments.
- Manage, monitor, and optimize automation tools for deployment, monitoring, and operations.
- Troubleshoot and resolve issues in development, testing, and production environments.
- Cost optimization of cloud infra, Linux based application deployment & troubleshooting using automated tools.
- Bachelor's degree in computer science, Engineering, or related field,
- 3 to 7 years of experience as Azure DevOps Engineer
- Experience building and maintaining CI/CD pipelines.
- Minimum 3 years of experience in Containerization (Docker and Kubernetes)
- Strong focus on automation and Agile software development
- Ability to conveniently deploy monitoring and logging infrastructure using tools like Prometheus, Nagios, and Datadog
- Knowledge of Configuration management tools like Puppet, Chef, or Ansible

Personal Skills

- Ability to work on complex, highly visible, global engagements under minimal supervision.
- Ability to successfully operate in a fast-paced, dynamic and high-pressure environment.
- Ability to manage multiple applications across various cloud platforms at a single point of time.

Keywords:

Essentials: Azure DevOps, Jenkins, Docker, CI/CD pipelines, container, Nginx, Grafana, Prometheus

Preferred: MLOps, Puppet, Chef, SonarQube, Kubernetes, Ansible, Databricks
