

Job Description

Company	Course5 Intelligence
Position Title	IC
Reporting to	Senior Manager
Schedule	Full-Time
Work Location	Bangalore / Mumbai /Gurgaon / Coimbatore

OVERVIEW

Course5 Intelligence

We enable organizations to make the most effective strategic and tactical moves relating to their customers, markets, and competition at the rapid pace that the digital business world demands. Founded in 2000, our business areas include Market Intelligence, Big Data Analytics, Digital Transformation, Artificial Intelligence, and Analytics. Rapid advances in Artificial Intelligence and Machine Learning technology have enabled us to create disruptive technologies and accelerators under our Course5 Intelligence suites that combine analytics, digital, and research solutions to provide significant and long-term value to our clients. Job Responsibilities:

As a part of the data science team of Course5's Advanced analytics and Applied AI division, we are looking for a Data Scientist who is diligent, detail-driven, and ambitious to provide the SME expertise, design solutions and best practices to lead the projects for our partners across the globe for all AI implementations.

This position will require a strong background and working experience in developing scalable, sustainable and cloud agnostic data marts/lakes to enable effective deployment of AI algorithms developed to solve custom problems in the partner ecosystems for sandboxes as well as for the production deployments for continuous modeling, testing, improvement and deployment.

This role expects you to be a self-starter and ability to handle ambiguity with respect to the expectations, objective, data and would require discrete and constant attention to details. You will be leading and delivering the projects and are expected to have experience in application agile project management principles. You should be organized and have the ability to work on multiple projects, streams of work and stakeholders.

You'll also have the chance to shape the direction of our products and services. This is through gathering feedback from customers whilst collaborating with our engineering and service teams.

- Apply domain expertise in CPG, healthcare, or technology to develop data-driven solutions that address complex challenges in the industry.
- Collaborate with cross-functional teams to identify business problems and opportunities where data science can provide valuable insights and solutions.

- Utilize Python for data manipulation, analysis, and model development, demonstrating proficiency in
- creating efficient and well-documented code.
- Showcase a strong portfolio of successfully deployed machine learning projects that highlight
- expertise in predictive modeling, classification, regression, clustering, and more.
- Hands-on experience in deep learning techniques related to computer vision and/or Natural Language Processing (NLP), with a preference for expertise in PyTorch or Keras.
- Exhibit knowledge of MLOps practices, enabling smooth integration of machine learning models into production systems and maintaining their lifecycle.
- Demonstrate an intermediate level of proficiency in cloud platforms (e.g., AWS, Azure, GCP) to ensure efficient and scalable deployment of machine learning solutions.
- Stay up to date with the latest advancements in data science, machine learning, and AI technologies
- to provide innovative insights and solutions

Requirements & Qualifications:

- Bachelor's or Master's degree in a relevant field such as Computer Science, Data Science, Statistics, or a related quantitative discipline.
- Hands on experience on Knowledge Graph & Decision engines is a must.
- 4-8 years of proven experience as a Data Scientist, with a track record of successful project delivery and demonstrated impact on business outcomes in domains related to CPG/Tech/Healthcare.
- Expertise in Python programming, including libraries such as NumPy, Pandas, scikit-learn, and others commonly used in data analysis and machine learning.
- Hands-on experience developing and deploying machine learning models in real-world applications.
- Strong understanding of deep learning techniques, especially in the domains of computer vision or NLP is good to have.
- Proficiency in at least one deep learning framework, preferably PyTorch or Keras.
- Intermediate-level experience with MLOps practices and cloud platforms for model deployment.
- Familiarity with PySpark and Databricks is a plus.
- Excellent problem-solving skills and the ability to work collaboratively in a fast-paced, team-oriented environment.
- Strong communication skills to effectively convey complex technical concepts to non-technical stakeholders.

Course5 is proud to be an equal opportunity employer. We are committed to equal employment opportunity regardless of race, color, religion, sex, sexual orientation, age, marital status, disability, gender identity, etc. If you have a disability or special need that requires accommodation, please keep us informed about the same at the hiring stages for us to factor necessary accommodations.
